PROFILE

I develop intuitive, scalable web applications with current JavaScript technology. I have a solid background in both frontend and backend development and enjoy building seamless user experiences and efficient server logic. I love learning new tools, contributing to open-source projects, and solving hard problems with clean, readable code. Open-source collaboration and meticulousness characterize my development process.

SKILL

- | | | | |
|--------------|-------------------|---------------------|-------------------|
| • React | • NodeJs, Express | • MongoDB, Mongoose | • Render, Netlify |
| • JavaScript | • C Language | • Git-GitHub | • HTML, CSS |
